

ADIL ABBASI

Computer Science Student (6th semester) | Software Development | Data Science | AI/ML

Email: adilabbasy233@gmail.com | Phone: +92-303-0099193 | LinkedIn: linkedin.com/in/adil-abbasi-20455530

GitHub: github.com/adil-abbasi

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in software development, data analysis, machine learning workflows, and AI-assisted desktop automation. Skilled in Python, SQL, React, and database fundamentals, with portfolio projects in web platforms, predictive analytics, time-series experimentation, and intelligent desktop tools. Seeking an internship where I can contribute clean code, structured problem solving, and practical project development.

Technical SKILLS

Programming:	Python, Java, C++, SQL, JavaScript
Web / Frontend:	HTML, CSS, React, React Router, Tailwind CSS, Axios, Vite, responsive UI design
Backend/API:	REST API fundamentals, Firebase, Node.js/Express basics, JWT authentication concepts
Data Science/ML:	Pandas, NumPy, Scikit-learn, XGBoost, Prophet, Matplotlib, Seaborn, Plotly, Streamlit, Data Cleaning, Time-Series Forecasting, Prediction Models, Data Visualization
Databases/Tools:	MySQL, MongoDB, schema design, joins, subqueries, grouping, Git, GitHub, VS Code, Jupyter, Colab, Postman, npm

PROJECTS

Orvix - Multilingual AI Desktop Assistant | *Python, LLM Concepts, Desktop Automation / In Progress*

- Building an intelligent assistant for students/developers with typed commands first and planned English/Roman Urdu voice support.
- Designed modules for safe PC actions, confirmations, smart path handling, aliases, note generation, and coding-support workflows.

DevSync - Developer Services / Project Marketplace Platform | *React, JavaScript, Tailwind CSS, Firebase*

- Designed a professional landing-page-to-dashboard flow where users can upload projects and access developer services.
- Worked on responsive UI sections, branding, animations, authentication-flow planning, dashboard experience, and modular React components.

Global Waste and Hunger Prediction | *Python, Pandas, Machine Learning, Visualization*

- Built an end-to-end data science workflow using waste and hunger/food-security indicators for patterns, trends, and prediction features.
- Applied data cleaning, EDA, visualization, preprocessing, feature handling, model comparison, and responsible interpretation.

Stock Price Prediction Experiments | *Python, LSTM, Time Series*

- Experimented with LSTM forecasting using historical data and OHLCV features while learning leakage risks and baseline comparison.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Sukkur IBA University, Khairpur campus Pakistan | Current Student | Expected Graduation: 2027

Intermediate / Higher Secondary Certificate (HSC)

Superior Science College Khairpur Pakistan | Pre-Engineering | Completed: 2022

Matriculation / Secondary School Certificate (SSC)

Model School (S.A.L.U) Khairpur Pakistan | Completed: 2020

CERTIFICATES

IBM Data Science Professional Certificate - Coursera

14-course program covering Python, SQL, data analysis, visualization, and machine learning.
